

# Wood chopping machines for long logs

*...Stationär und mobil!*

**- LHSP 1200**

**- LHSP 1500**

With our well qualified team we offer you design, manufacture and assembly of complex chopping machines for long logs with a variety of auxiliary equipment. Please let us know your specifications!

**S & Ü Your Partner for  
innovative solutions**

# Wood chopping machines for long logs 1200 / 1500

...Fast, good, reliable!

## Technical specifications: LHSP 1200

Basic version:  
for log diameters up to 120 cm  
stationary  
Nozzle shaft driven  
chopping pressure 40 - 60 tons  
stroke - approx. 3500 mm  
Elektric control  
4- fold chopping cross  
rear table

## Optional equipment:

- Chopping cross 3-fold
- Chopping cross 6-fold
- Chopping cross 8-fold
- Chassis, up to 8 tons maximal weight, up to 40 km/h speed, overrun brake
- Chassis, up to 12 tons maximal weight, up to 80 km/h speed, pneumatic brake
- SPS Siemens control
- Diesel engine John Deere 4 cyl. EURO III
- Diesel engine John Deere 6 cyl. EURO III
- crane / crane mounting / hydr. System for crane
- additional supporting stands at the front
- assembly on mobile chassis frame
- additional specifications upon request

# Wood chopping machines for long logs 1200 / 1500

...Powerful!

Technical specifications: LHSP 1500

Basic version:  
for log diameters up to 150 cm  
stationary  
Noyle shaft driven  
Chopping pressure 80 tons  
Stroke - approx. 3500 mm  
Elektric control - 12 V  
3-fold chopping cross  
Rear table
