

Hydraulik und Maschinenbau GmbH

CUSTOMISED

FLEXIBLE

CUSTOMER-FOCUSED

WE ARE **S&Ü** Hydraulik und Maschinenbau GmbH

S&Ü Hydraulik und Maschinenbau GmbH is your expert partner for hydraulics and mechanical engineering, based in Marienmünster-Löwendorf, East Westphalia. For 30 years, our highly qualified team has been developing innovative and customised system solutions for demanding applications. Benefit from our many years of experience and in-depth expertise in the hydraulics and mechanical engineering sectors.

THE **S&Ü** TEAM

ASKING THE RIGHT QUESTIONS FINDING ANSWERS DEVELOPING SOLUTIONS

We are a customer-focused company. But what does that actually mean for our customers? For us, being customer-focused means that we ask the **right questions**, **find answers** and work with our customers to **develop** sustainable and tailor-made **solutions**.

Thanks to the size of our company, we are both quick and flexible. Our strength lies in project-based work – bespoke solutions for businesses of all sizes across a wide range of sectors.

S&Ü A FAMILY BUSINESS

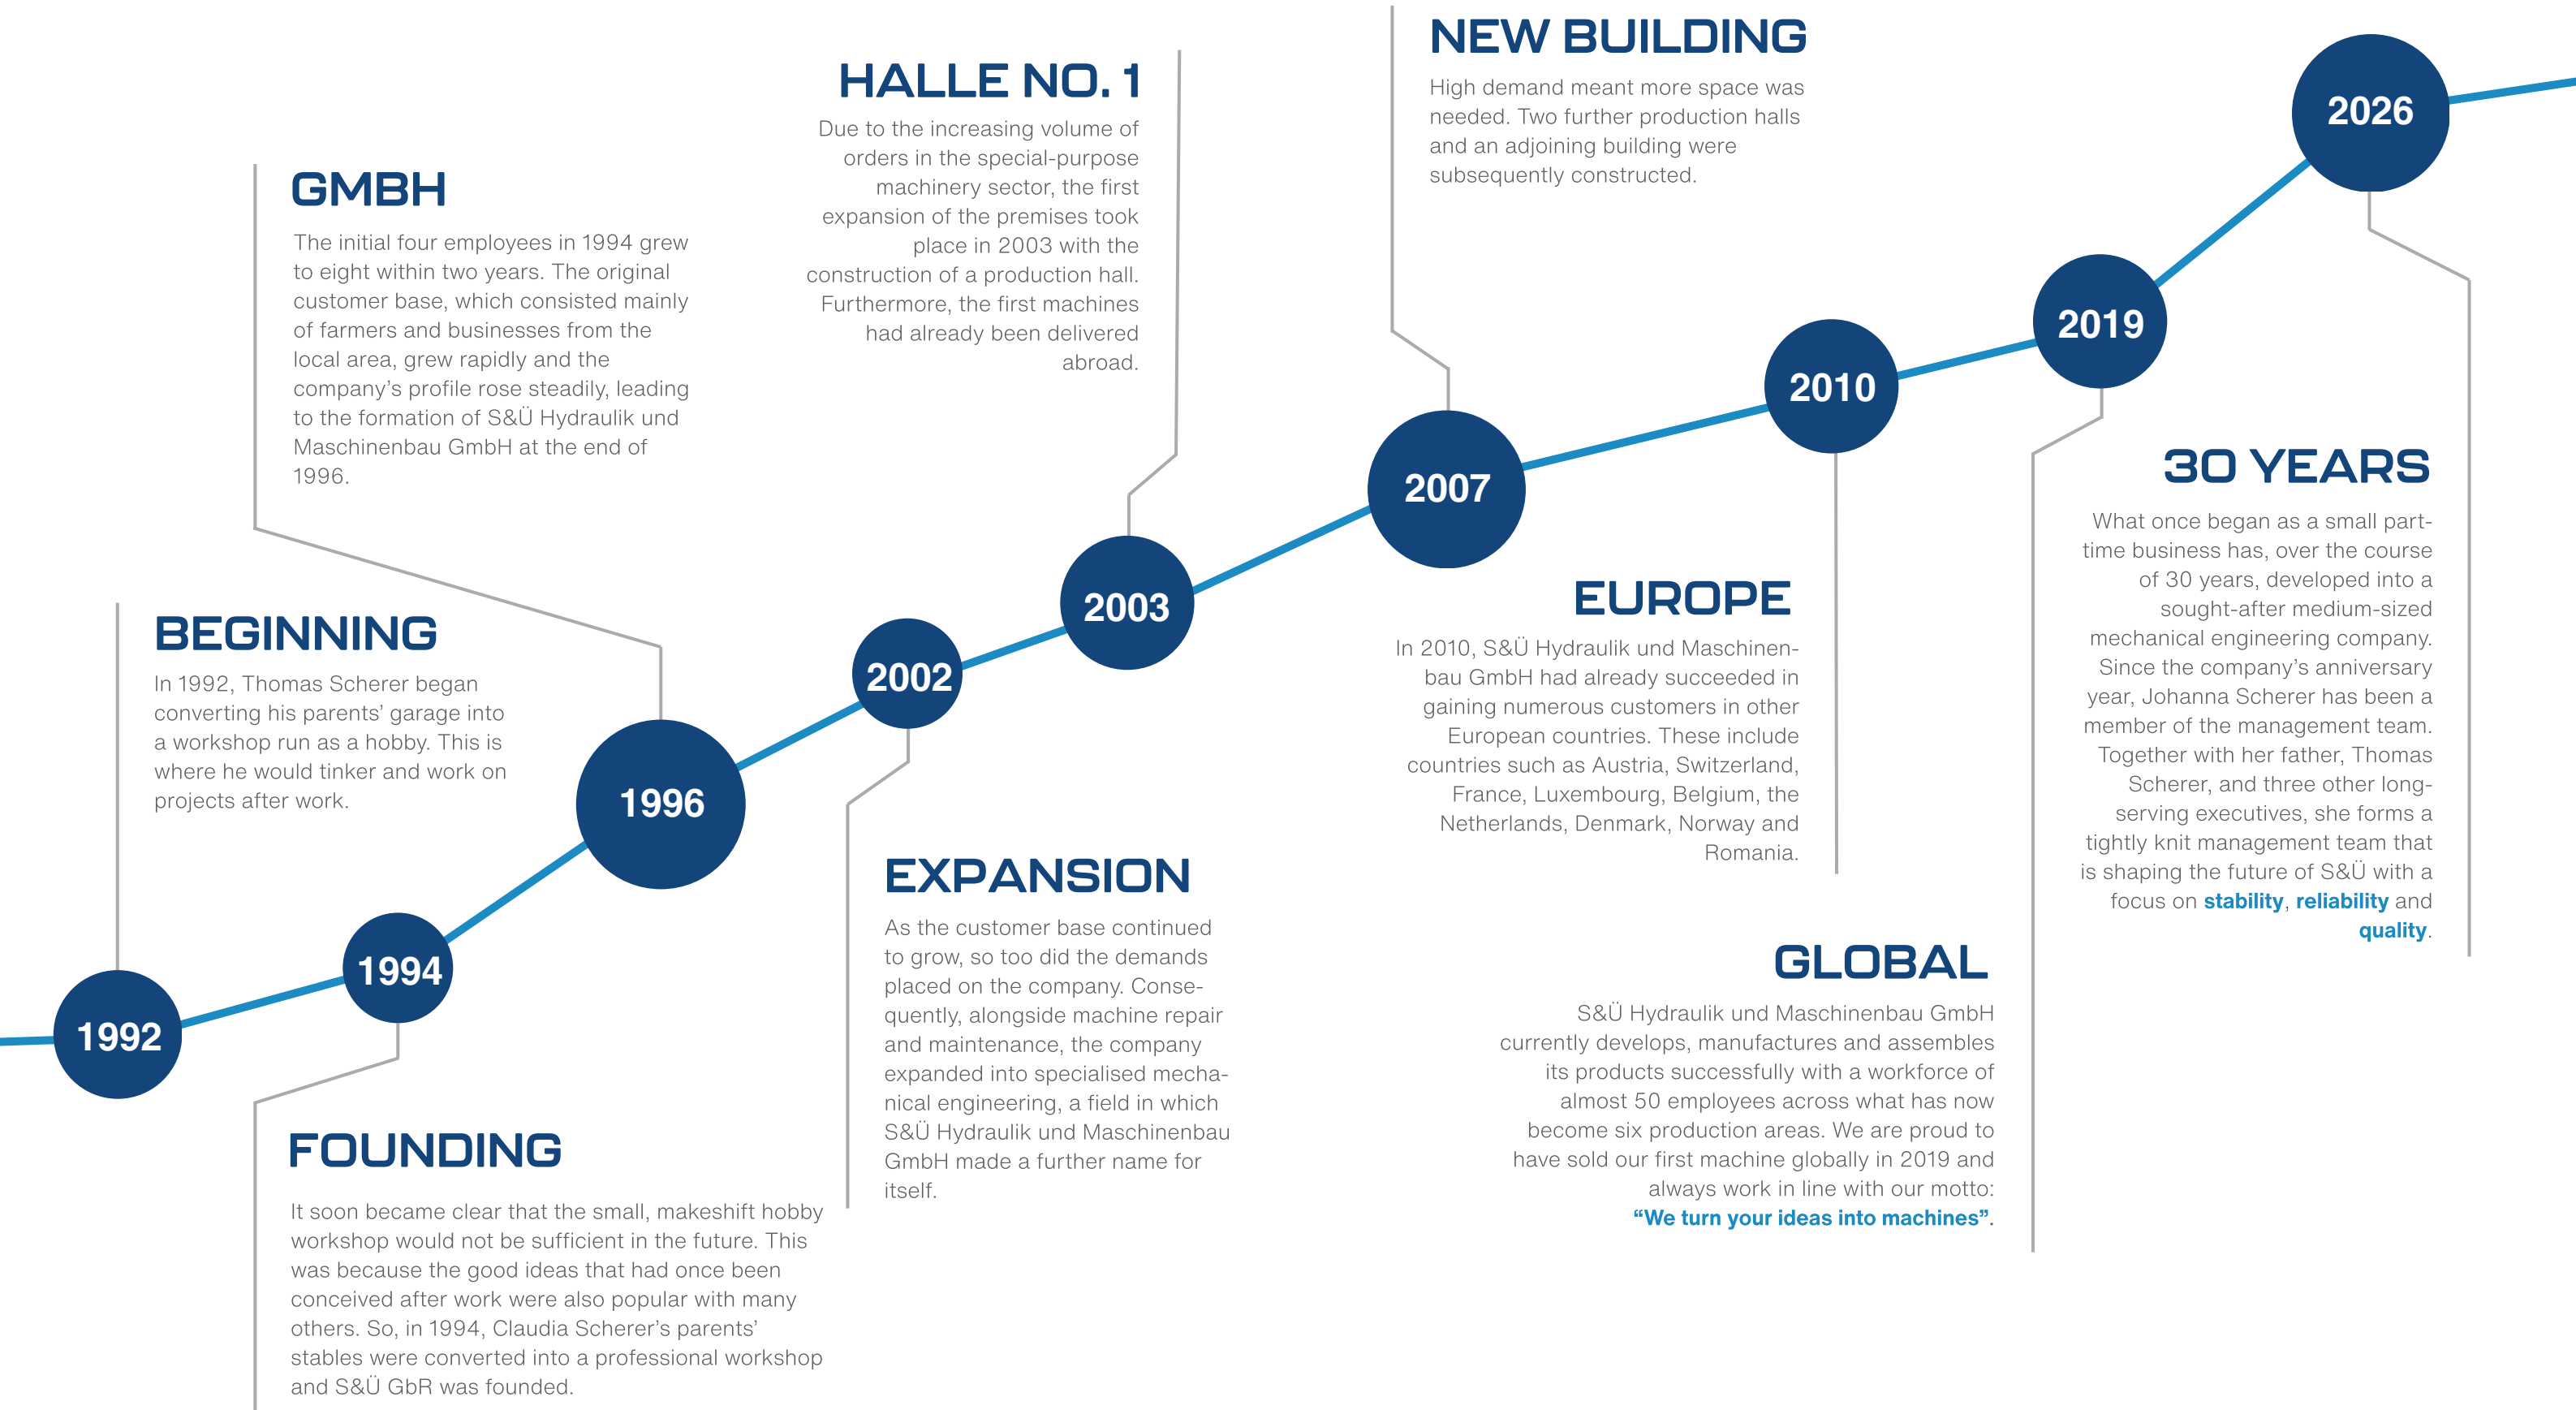

Our family-run business, S&Ü Hydraulik und Maschinenbau GmbH, was founded in 1996 by us, **Thomas and Claudia Scherer**.

Having successfully completed her degree, our daughter, **Johanna Scherer**, has now also joined the company.

As Managing Director, I am proud to work with a highly qualified team to successfully develop innovative and tailor-made machines in close collaboration with our customers.

MANAGEMENT TEAM

at S&Ü

WE ARE

CONSTRUCTION & ENGINEERING

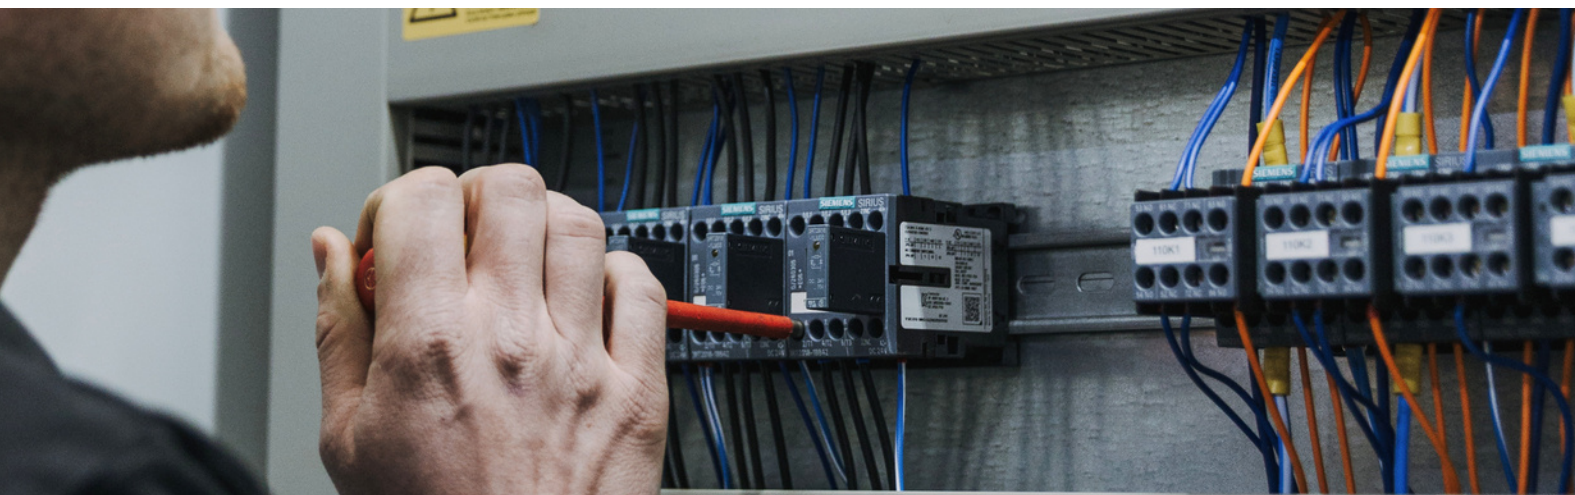

Complex plant projects require extensive expertise and constant innovation. To the benefit of our customers, S&Ü offers complete system solutions from a single source. From conception right through to implementation in a real environment, we guide and support you through every stage of the project.

MECHANICAL ENGINEERING

Our mechanical engineering work ranges from traditional press construction and testing and cleaning systems, through fully automated packaging lines and complex conveyor systems, to racking systems and lifting, hoisting and tilting devices. In addition, we offer practical, bespoke solutions for the food industry and develop complex metalworking systems.

CONTROL & AUTOMATION

Intelligent control systems enable plants, machines and processes to be automated and optimised in a sustainable manner. In the services sector, we carry out project analyses, planning and software development. In addition, we develop and manufacture control cabinets, electronic equipment and electrical installations.

HYDRAULIC SYSTEMS

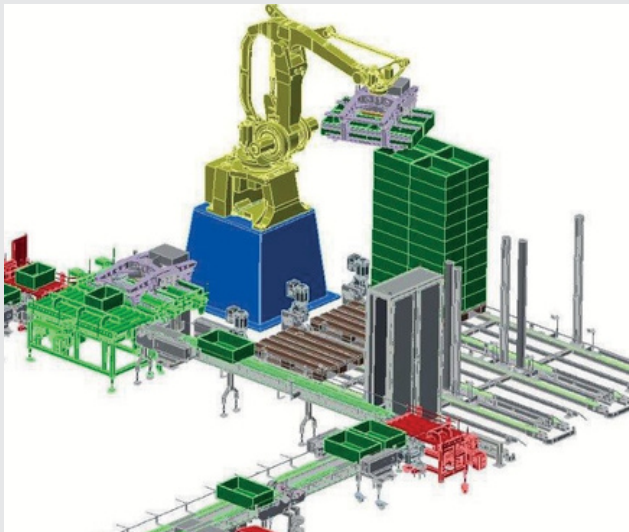

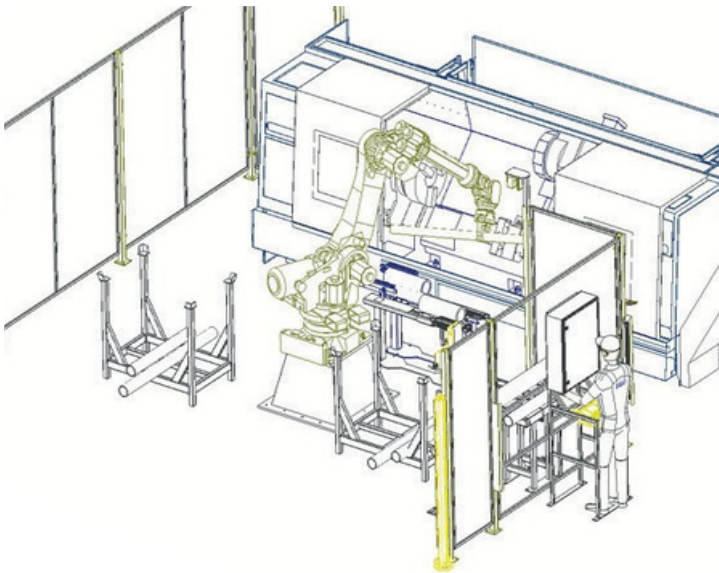

The range of hydraulic systems extends from traditional applications, such as hydraulic power units and tanks, through to pumps and motors, and includes oil supply and lubrication systems. In addition, we offer a wide range of accessories such as valves, screw connections, adaptors, cylinders, hydraulic hoses and couplings.

FROM PLANNING TO DEVELOPMENT AND IMPLEMENTATION

Complex projects require extensive expertise and constant innovation. **We turn your ideas into machines!** To the benefit of our customers, S&Ü offers complete system solutions from a single source. We guide and support you through every stage of the project, right through to the **installation and startup of the systems** we have designed.

Our engineers and skilled workers have **extensive experience** in various areas of specialised machine construction. This enables us to implement subsequent customer requests and functional changes efficiently and flexibly.
